We hope you are able to join us at 6 pm when Alex Wade of **Liberty Wine Merchants** will lead us on a wine tasting.

Following dinner, our guest speaker, Dr. William Schreiber will speak on **Celebrity Drug Deaths**.

The public is fascinated by powerful, rich and famous members of society. Some of these celebrities have met a premature death by taking illicit drugs, prescription medications, or both. Why they took these substances is a matter of speculation, but the effects on the human body are well known. Dr. Schreiber will consider the pharmacologic properties of the drugs that were used and how, in sufficient quantities, they can lead to death."

Dr. Schreiber is a consultant pathologist at Vancouver General Hospital with service responsibilities in the broad area of clinical chemistry. He is also medical director of the Provincial Toxicology Center, which provides both forensic and clinical toxicology services for the province of British Columbia.
